EXAMINER'S AMENDMENT

1. Receipt is acknowledged of amendments filed on 8/28/2003.
2. Claim 1 is presented for examination.
3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Michael Lau on 29 September 2003 (see the interview summary, paper no. 9292003).

4. The application has been amended as follows:

IN THE CLAIMS

5. Claim 1, line 10: Replace "which is capable of" with --for--.

Allowable Subject Matter

6. Claim 1 is allowed.
7. The following is an examiner's statement of reasons for allowance: The best prior art of record cited by the examiner, Umeda et al., taken alone or in combination with other references, fails to teach a delivery system with locker cabinet, wherein each locker is operated by a central control unit with a set of keys, further comprising a second barcode reader, and a calling button wherein a center manages the locker cabinet. Although, the above limitations have been taught in particular by other references [such as Kaarsoo et al. U.S. 5,475,378 discloses electronic access

control mail box system with a local control unit; Sukegawa U.S. 5,235,165 teaches system for issuing resident certificates which includes a calling button in case of trouble; also it is known in the art of supermarket systems using more than one barcode reader one stationary and another one portable], the motivation for combining all these systems together with the prior art, Umeda et al., would have not been that obvious to an artisan skilled in the art. These limitations in conjunction with other limitations in the claimed invention were not shown by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Kaarsoo et al. U.S. 5,475,378 discloses electronic access control mailbox system with a local control unit.

Sukegawa U.S. 5,235,165 teaches system for issuing resident certificates.

Watabe (U.S. 5,223,829) discloses electric locker apparatus with automatic locker box designation.
